

User Interface (UI) Documentation

Homepage/Start Page:

The homepage or start page presents the following elements:

Number of Records: This indicates the total number of rows displayed on the page.

Search Bar: Use the search bar to search for specific data within the table.

Download Button: Click on the download button to download the data.

Initial Table Data: The data displayed in the table originates from the Database table.

The screenshot shows a web browser window with the title "Chassis Dyno Test Data Filter". The interface includes a search bar, a "Download" button, and a table of test data. The table has columns for TestName, TestDateTime, Cell, VehicleID, DriveTrace, Engineer, Driver, IWR, RMSSE, TotalCOgkm, and TotalCO2gkm. The table displays 10 records.

Filtering Data:

- Click on  to filter the data.
- Select the desired filters from the dropdown menu. For example, to filter the list of tests by vehicle IDs, choose the "Vehicle IDs" option from the dropdown.

The screenshot shows the same web browser window as before, but with the "Filter Data" dialog box open. The dialog box has a title "Filter Data" and a close button. It contains a dropdown menu with the following options: "Filter list of tests by vehicle IDs", "Filter the list of Driver Names by Cell Numbers", "Filter the list of tests by Drive Traces", "Filter the list of tests between two IWR Values", and "Filter the list of tests between TotalCOgkm and TotalCO2gkm". The "Filter list of tests by vehicle IDs" option is selected.

You can use similar steps to perform filter operations using other filter options.

Filter list of Driver Names by Cell Numbers:

The screenshot shows the 'Chassis Dyno Test Data Filter' application. A modal dialog titled 'Filter Data' is open, displaying a dropdown menu with the text 'Filter the list of Driver Names by Cell Numbers'. Below the dropdown, a 'Select Values' section shows a list of cell numbers: C7, C6, and C8. Two buttons are visible at the bottom of the modal: 'Get Driver Names' and 'Apply filter on previous filtered data'. The background shows a table with columns 'TestName', 'TestDateTime', and 'TotalCO2gkm'.

Filter list of tests by Drive Trace:

The screenshot shows the 'Chassis Dyno Test Data Filter' application. A modal dialog titled 'Filter Data' is open, allowing users to filter the list of tests by Drive Traces. The dialog includes a dropdown menu with the text 'Filter the list of tests by Drive Traces'. Below this, a 'Select Values' section displays a list of drive traces: EU02, US02, US01, and EU01. There are three buttons at the bottom of the dialog: 'Get list of tests', 'Apply filter on previous filtered data', and 'Remove Filter'. The background shows a table with 29 records, with columns for TestName, TestDateTime, and various performance metrics.

Filter list of tests where the TotalCOgkm is less than Min TotalCOgkm and the TotalCO2gkm is greater than Max TotalCO2gkm

Result:

Additional Functionalities:

Apply Filter on previous filtered data button:

This button allows you to apply filters on previously filtered data. For example, if you have already filtered the list of tests by Vehicle ID G, you can use this button to further filter the data.

Steps to apply a new filter on previous filtered data:

- Filter the list of tests by Vehicle ID G.

Number of Records: 100
